

Enerflex in action

Lekhwait, Oman

195 MMSCFD amine sweetening plant

Enerflex's single source solution ensured the project was delivered with outstanding results.

Enerflex supplied two amine sweetening units with a total capacity of 195 MMSCFD. Enerflex was chosen based on the Company's proven history as the single-source solution, providing engineering, design, procurement, coordination, fabrication, inspection, testing, painting, shipment, supervision of assembly, commissioning, performance testing, and operations training.

Outcome

Enerflex completed this DEP specification compliant amine sweetening plant safely, under budget, and on-time. By leveraging the Enerflex single-source solutions approach — combining reliable and efficient equipment with in-house expertise, and demonstrating our knowledge of the regional supply chain — we were capable of completing such a complex project with outstanding results.
